AUGUST 2012 (FY2012)

FIXED-ROUTE SYSTEM RIDERSHIP OVERVIEW - Explanation of Information

How to read this report

Introduction

This report shows how many customers used the combined METRO bus and rail systems in a given month and year-to-date. Ridership statistics are given on a system-wide and route/station level basis as well as by weekday, Saturday, and Sunday.

Ridership is counted as *boardings*, or *unlinked passenger trips* (National Transit Database (NTD)).

How are customers counted?

Bus

Boardings are recorded by automatic passenger counters (APCs) and passenger count cards. METRO has equipped 100% of its fixed-route bus fleet with automatic passenger counters. The raw data are adjusted for missing data and APC under counting as approved in METRO's NTD alternative sampling methodology. Additionally, there are certain routes for which passenger count cards are used due multiple fares on the same route (Route 236 San Jacinto / Baytown).

Rail

Boardings are recorded by automatic passenger counters (APCs). METRO has equipped 100% of its fixed-route rail fleet with automatic passenger counters. The raw data are adjusted for missing data and APC under counting for Special Events as approved in METRO's NTD methodology.

How do I read the overview?

The next 3 pages provide an overview of the average daily boardings on local and Park & Ride bus and METRORail for weekday, Saturday, and Sunday for both the current month as compared to the same month last year and for the current fiscal year-to-date as compared to the previous fiscal year-to-date. Information is also presented for the 10 bus routes with the highest average daily ridership, the highest growth between FY2011 and FY2012, and the highest loss between FY2011 and FY2012 for weekday, Saturday, and Sunday. The 10 bus routes with the highest average daily ridership are also presented in graphical form compared to the average ridership for a weekday, Saturday, or Sunday route.

How do I compare this year to last year?

Boardings data are presented on an average daily basis for ease of comparison. For example, Route 1 Hospital - weekday had 4,369 average daily boardings during FY2012 (October 2011 - August 2012) as compared to 4,307 average daily boardings during FY2011 (October 2010 - August 2011). The change in ridership between FY2011 and FY2012 was + 62 boardings or 1.4%. This percentage increase was higher for Route 1 Hospital than for the average of all weekday routes (+0.3%). A similar presentation is done for each METRORail station.

Are all days included in average daily boardings?

The average daily data cover the service operated on typical days in accordance with the normal schedule (for fixed schedule service). A typical day is a day on which normal, regular service is operated. The average daily data does not include days when 1) extra service is provided to meet demands for special events (e.g., the Houston Livestock Show and Rodeo), or 2) service consumed (or ridership) is reduced due to unusually bad weather (e.g., temperatures at or in excess of 100° or days with significant amounts of rainfall), or 3) holidays (e.g., Christmas). (*From the NTD 2011 Annual Reporting Manual, Service form (S-10), p. 190*)

Why do some route numbers have two different names?

One means of improving operational efficiency is the use of a single bus on multiple bus routes that each serve downtown. Bus routes that are combined in this manner are through-routed or "hooked." For example, Route 3 Langley and Route 3 West Gray are "hooked" and share the same bus equipment. Currently, METRO operates 14 weekday through-routed / "hooked" route combinations.

METROBus Indicators - Explanation of Information

How can I evaluate the ridership (demand) and the service resources supplied to each route (supply)?

METRO uses four indicators in its comparative / route ranking model. The four indicators are:

- 1) Passenger Boardings per Revenue Mile;
- 2) Passenger Boardings per Revenue Hour;
- 3) Total Subsidy per Passenger Boarding; and
- 4) Operating Ratio.

These four factors provide a balanced weighting between effectiveness measures (the first two factors), and efficiency measures (the last two factors). By using the two effectiveness indicators, the reader can compare the effectiveness of multiple bus routes. (NOTE: With only 1 rail line, there is no opportunity to compare effectiveness with other rail lines in METRO's system at this time.)

The indicator passenger boardings per revenue mile is calculated by dividing the number of average daily passenger boardings by route by the daily number of revenue miles of service supplied on that route. The indicator passenger boardings per revenue hour is calculated by dividing the number of average daily passenger boardings by the daily number of revenue hours of service supplied on that route.

The indicators are presented in two different formats on the following pages. The first format for presentation is by route number order. Route number format allows the reader to look at the performance on one or more routes of interest. The second format for presentation is by indicator performance, highest to lowest. For ease of viewing, an additional visual presentation format has been added. Routes with indicators in the first (best) quartile are shown in white, while those in the second (next-best) quartile are shown in gray, those in the third quartile are shown in pink, and those in the fourth (worst) quartile are shown in purple.

Additionally, the report includes charts showing the performance of the ten best and ten worst routes by indicator along with the average performance.

NOTE: The service levels used for these calculations are the current service levels, while the ridership used are year-to-date. The indicators on routes which had additional service added in February 2012 will be lower than expected as the anticipated ridership growth associated with this additional service has not yet occurred. The converse will also be true.

AUGUST 2012 (FY2012)

Composite of Boardings and Indicators by Route - Explanation of Information

How can I compare the weekday, Saturday, and Sunday services on a particular route?

The following section of the report presents the average daily boardings, boardings per revenue hour, and boardings per revenue mile for each route. Some routes operate only on weekdays, while other routes operate only on weekdays and Saturdays. Cells that would show data for Saturdays and Sundays where service is not operated are shaded for ease of viewing.

How can I compare the performance of a particular route within a given category?

METRO's Service Planning section has categorized each route into one of the following service categories:

- Local - Radial
- Local - Crosstown
- Local - Circulator
- Local - Limited
- Local - Shuttle
- Park & Ride - CBD Peak Period
- Park & Ride - CBD Off-Peak Period
- Park & Ride - Secondary Activity Centers

A consolidated summary of average daily boardings, boardings per revenue hour, and boardings per revenue mile are provided. Additionally, charts show a relative comparison of the performance of each of these service category groups in these two effectiveness indicators for weekday, Saturday, and Sunday.

Includes bus bridge for service interruptions

- 1) Calendar Mix. There was no change in the calendar mix in August 2012 relative to August 2011. Monthly data are not adjusted for changes in calendar mix.
- 2) Fare Increase. There was no change in METRO's base fare between FY2011 and FY2012. No ridership change would have been expected due to fares.
- 3) Gasoline Prices. Gasoline prices increased in August 2012 relative to August 2011. However, there is no statistical correlation between changes in gasoline prices and local bus ridership and the only statistical correlation between gasoline prices and Park & Ride ridership occurred in FY2008 during the time period when the average price of a gallon of gasoline exceeded the maximum base fare for a Park & Ride (then \$3.50). No ridership change would have been expected due to the change in gasoline prices.
- 4) Special Events - METRORail. There was 2 special events in August 2012 and two special events August 2011. No ridership change would be expected due to special events.
- 5) Service Interruptions - METRORail. There was 1 service interruptions in August 2012 compared to no service interruptions in August 2011. A ridership decrease would be expected due to the service interruption.
- 6) Unemployment. The unemployment rate was 7.5% in July 2012 compared to 8.4% in August 2011. A positive ridership change would be expected due to the improved unemployment rate.
- 7) Weather. Average temperature of 86° and 3.88 inches of rainfall in August 2012 as compared to average temperature of 91° and 0.09 inches in August 2011. The increase in rainfall was offset by the decrease in the number of days when the temperature was equal to or exceeding 100° in August 2012 relative to August 2011 leading to no expected change in ridership associated with the weather.
